

FARMS NOT COAL

Petition to the New South Wales Parliament - Phase out coal for energy and promote clean renewable energy alternatives

To the Honourable Speaker and Members of the Legislative Assembly of NSW. This petition brings to the attention of the House that:

- Coal is the number one cause of climate change, pollutes water, destroys farmland and coal dust makes people sick;
- Wind and solar can provide clean renewable energy.

The undersigned petitioners therefore ask the Legislative Assembly of NSW to:

1. Implement laws and policies to phase out the use of coal for energy, including a transition package for affected workers and communities;
2. Promote clean renewable energy alternatives such as wind and solar.
